RAILTACT

CAPABILITY STATEMENT

Tactile Solutions to Ensure Accessibility Compliance for Public Infrastructure

INTRODUCTION & OVERVIEW

About Railtact

At RAILTACT, we are more than just a tactile supplier; we are pioneers in ensuring accessibility compliance for Railway Stations and Public Infrastructure. Our specialisation lies in the supply and installation of non-yellowing UV stabilised polyurethane Tactiles, designed to meet the highest industry standards and ensure the utmost safety and accessibility for all.

Our Legacy

Our journey began under the umbrella of Continuous Solutions Pty Ltd, where we gathered extensive experience and built a reputation for excellence in the tactile industry. Recognising the unique challenges and specific needs of tactile installations for Railway Stations & Public Infrastructure, we made a strategic decision. RAILTACT Pty Ltd was born as a separate entity, dedicated solely to providing specialised tactile solutions. This transition allowed us to offer a more focused and tailored service to our clients, drawing upon the rich legacy and expertise of Continuous Solutions Pty Ltd.

Over the years, we have successfully completed tactile replacement projects on multiple Railway Stations and Public Infrastructure projects across New South Wales, Australia. Each project stands as a testament to our commitment to quality, precision, and customer satisfaction.

Evolution And Growth

While RAILTACT Pty Ltd might be a newer name, our roots run deep. The decision to evolve from Continuous Solutions Pty Ltd to RAILTACT Pty Ltd was driven by our desire to serve our clients better. By leveraging the experience and history of our parent company, we've established RAILTACT Pty Ltd as a trusted and well-established name in the industry. Our evolution story is a reflection of our adaptability, foresight, and unwavering commitment to excellence.

OUR PRODUCTS & SERVICES

Polyurethane Discrete And Directional Tactile

At RAILTACT, we take pride in our Polyurethane Discrete And Directional Tactiles, a product that stands out in both quality and functionality. Here's what sets our tactiles apart:

Australian Manufactured: Our tactiles are proudly manufactured in Australia, ensuring that they meet the highest local standards and contribute to the national economy.

UV Stabilised: Designed to withstand the harsh Australian sun, our tactiles are UV stabilised ensuring they remain non-yellowing and retain their appearance and functionality over time.

CSIRO Certified: Our product has been rigorously tested and certified by CSIRO, Australia's premier scientific research organisation. This certification is a testament to the product's quality and reliability.

Compliance with Standards: Our tactiles are not just compliant, but they exceed the standards set by AS/NZS 1428.4, ensuring that they are suitable for both external and internal use and offer optimal slip resistance.

Diverse Colour Range: Available in a range of colours including white, sky blue, dark blue, yellow, black, and daffodil, our tactiles can seamlessly integrate into various design aesthetics while ensuring clear visual contrast for safety.

10-Year Warranty: We stand by the durability and quality of our product, offering a 10-year warranty for added peace of mind.

Supply & Installation

RAILTACT is not just a product supplier; we are a comprehensive solution provider. Our services encompass:

Nationwide Supply: With a short lead time, RAILTACT Tactiles can be shipped to locations all around Australia, ensuring timely delivery for your projects.

Expert Installation: Our installation team is not just skilled but specialises in the nuances of tactile installation. Whether it's replacing existing tactiles on concrete platforms or drilling and installing on newly resurfaced asphalt platforms, we ensure precision and efficiency. Our team utilises 12-drill rigs designed specifically for this purpose.

Qualified Team: Every member of our installation team holds a valid Rail Industry Worker (RIW) card, ensuring they are well-versed with the safety and operational protocols of the railway industry and public infrastructure.

End-to-End Project Management: From the initial consultation to the final installation, our project management team ensures a smooth, hassle-free process, keeping you informed at every step.

WHY CHOOSE RAILTACT

Why Choose RAILTACT

In an industry where precision, quality, and reliability are paramount, RAILTACT stands out as a leader. Our commitment to excellence is not just a statement; it's a promise we deliver on, project after project. Here's why partnering with RAILTACT is the right choice:

Our Values

Excellence: We strive for excellence in everything we do, always delivering high-quality products and services to our customers.

Transparency: We prioritise open and honest communication with our customers and employees, building trust and accountability.

Durability: We prioritise delivering durable and long-lasting products and services, providing our customers with reliable solutions that stand the test of time.

Mission

Thrive to set the industry benchmark by providing high quality product and superior service.

Vision

Transform the Tactiles on Public Infrastructure projects in terms of product quality and installation service.

Choosing RAILTACT means choosing a partner who understands the intricacies of the tactile industry, values your project's success, and is committed to delivering results that exceed expectations. Let's embark on this journey of excellence together

EXPERTISE & EXPERIENCE

Showcasing Our Expertise: Projects That Speak Volumes

At RAILTACT, our projects are a testament to our commitment, precision, and unparalleled expertise. Here's a glimpse into our portfolio that underscores our capabilities:

1. Clarendon Station Upgrade – Transport Access Program TfNSW

Location: Clarendon, New South Wales

Client: Arenco

Scope: Supply and install Tactile Ground Surface Indicators on Platforms 1 & 2, and Ramps and Stairs.

2. Yagoona Station Upgrade – Transport Access Program TfNSW

Location: Yagoona, New South Wales

Client: Arenco

Scope: Supply and install Tactile Ground Surface Indicators on Platforms 1 & 2, and Ramps and Stairs.

3. East Hills Station Upgrade – Transport Access Program TfNSW

Location: East Hills, New South Wales

Client: Arenco

Scope: Supply and install Tactile Ground Surface Indicators on Platforms 1, 2 & 3 and Ramps and Stairs.

4. Stabling Facility – Sydney Metro City & Southwest

Location: Marrickville, New South Wales

Client: Abyss Construction

Scope: Supply and Install Tactile Ground Surface Indicators on Stabling Facility platforms.

5. Canley Vale Station Upgrade – Transport Access Program TfNSW

Location: Canley Vale, New South Wales

Client: Anric Group

Scope: Supply and install Tactile Ground Surface Indicators on Platforms 1 & 2, and Ramps and Stairs.

6. Como Station Upgrade – Transport Access Program TfNSW

Location: Como, New South Wales

Client: Degnan Constructions

Scope: Supply and install Tactile Ground Surface Indicators on Platforms 1 & 2, and Ramps and Stairs.

7. Refinery Square Pyrmont

Location: Refinery Square, Bowman Street, Pyrmont, New South Wales

Client: Department of Planning and Environment

Scope: Enhance the square's accessibility by replacing Tactile Ground Surface Indicators on top and bottom of stairs.
